REVOLUTIONARY
TRAINING
METHODS

MAY 2022 / £ 6.90

EDITORS' NOTE

by

Delphine BOUSSEAU-MILLOT, English teacher

Cécile BEDDELEEM, school librarian

Lycée Stephen Liégeois, BROCHON (21)

Here comes the second issue of UNBELIEVABLE!, a magazine entirely created by the class of PREMIÈRE 4 EURO, following a series of lessons about fake news and the role of media in our society.

The aim was to make students imagine some fake news of their own, and put it into shape using the codes of a news magazine. It was also a good opportunity for them to get acquainted with online publishing softwares and the main codes of news writing.

The other aim was for students to sensitize their schoolmates on this burning issue and make them think twice about what they read and share, in order to make them responsible citizens by not taking everything at face value.

They worked in pairs to produce their articles.

After a collective vote to select their top four articles, each group created a cover. Teachers picked their favorite cover to complete the magazine.

We hope you will enjoy reading this second issue of UNBELIEVABLE! as much as we enjoyed making it.

JUNE 2022

WINTER OLYMPIC GAMES 2022 REVOLUTIONARY TRAINING METHODS

by Sarah and Gwenn

Very...special training methods, during 2022 Olympics

During the 2022 Winter Olympics, which took place in Beijing, despite the scandal of missing snow, which was consequently replaced by whipped cream and mascarpone, the athletes of each country did everything to have the best results possible. Indeed, the coaches, sometimes special, had the wonderful idea to innovate to change a little the methods of trainings of their champions, methods, rather original...

Ski jumpers, including Marius Lindvik, trained by watching frogs, they studied very carefully the shape of their legs during their jumps!

Johannes Ludwig, gold medalist in luge, would have been trained by his 6 years old nephew, Antonin who would have taught him the most aerodynamic positions !

**IT'S MUCH MORE
DIFFICULT AND
THEREFORE MORE
CHALLENGING WHEN THE
TARGETS ARE MOVING!**

Eduard Latypov

Snowboarding : a rumor is circulating that the Chinese team will clean its boards with the tears of the Uighurs. indeed, these being in under nutritions, their tears are less salted and thus more adequate for the cleaning of their boards, in contact with the snow.

Figure skating : to do tricks, they analyze the very technical and precise functioning of a hand spinner in order to reproduce it and do the most tricks possible

Biathlon : the Russian team would have trained with the heads of Ukrainian death row inmates. "it's much more difficult and therefore more challenging when the targets are moving!" says Eduard Latypov, a Russian biathlete.

Skeleton: The Inuit team was inspired by their daily cohabitation with penguins to identify the way they glide in order to become as aerodynamic and fast as them

JUST KIDDING! *This article is fake news. Here is why:*

 The names of sportsmen such as Eduard Latypov, Marius Lindvik and Johannes Ludwig, who are really Russian, Norwegian and German champions in their respective disciplines

 all the crazy training methods x)

SPORT

MICHAEL JORDAN JOINS THE JDA THE GOAT IS COMING BACK IN DIJON

Even though Michael Jordan becomes the owner of the Charlotte Hornets NBA franchise more than 10 years ago, the 59-year-old American multi-billionaire star embarked on an unpredictable new challenge, that of taking up basketball in a very special club, the JDA Dijon !

Indeed, the all time greatest basketball player in the world would start playing basketball again in Dijon, city of mustard, which Michael Jordan loves more than anything. He decided after several visits to the eastern France city to sign with the JDA Dijon club in order to gather his two passions, basketball and mustard. You will see him next year in French and European championship games. In exchange for this contract, the club will offer him the best mustards of its partners.

Michael JORDAN playing for the JDA

"I'M BACK"

Michael Jordan

Who is Michael Jordan?

Michael Jordan is an American businessman and former professional basketball player, Olympic athlete, and actor.

Where did he play?

Jordan led the Chicago Bulls to six National Basketball Association championships and he dominated the NBA during the 80s and 90s. During few years, he also played baseball with the Chicago White Sox.

What did he win?

Michael has received the Most Valuable Player Award five times. With his five regular-season MVPs and three All-Star MVPs, Jordan has become the most decorated player in the NBA.

by Gaby and Johan, february 28th, 2022

- "I'm back": Jordan announced his return to the NBA on March 18, 1995, after a year and a half of retirement.

- Michael is the owner of the Charlotte Hornets NBA franchise.

- Jordan unfortunately doesn't restart basketball, let alone in a small town like Dijon in France.

- MJ has no attachment to mustard, although he loves French gastronomy

WE CAN TALK TO ORCAS !!

a scientist self-implants a dolphin brain, he can now talk to orcas

Louise , Margot 28/02/2022

The journey of the mad scientist

The famous French doctor Didier Raoult, known for his dubious experiments with COVID-19, is now tackling the marine world. Indeed the documentary film "Blackfish" by Gabriela Cowperthwaite and the animated TV series "spongebob" created by Stephen Hillenberg made him discover his passion for the marine world when he was very young. Since then he has been looking for a way to communicate with marine creatures, especially dolphins. But unfortunately he never succeeded despite an intensive training course at Marineland and a baptism of diving. However in 2018 Mr. Raoult had a new idea, to take LSD, he would have then declared "on a misunderstanding that passes". He took this drug in a dolphinarium but was expelled by security because of an altercation between him and a fire extinguisher who would have "looked badly".

Finally, in December 2021, the doctor decided to have an orca brain transplanted and as no surgeon in the world would do this operation, he transplanted his own brain using several mirrors in his laboratory in Tahiti. The operation was a success, as soon as it was over he went to the nearest Marineland to hear the dolphins and it worked. Indeed he heard the dolphins singing "I want to break free" of the group Queen, we wonder nevertheless where they could have heard this song.

But there are conséquences : Didier Raoult lost 80 point of IQ, it gives a negative IQ, he has a hungarian accent and he smells the oyster

Finally, even if this scientist did some crazy experiments, we cannot deny the fact that this is a major breakthrough in the scientific field. Maybe one day we will be able to fly with a pigeon's brain or change colour with a chameleon's brain. However, as long as there are such restrictive side effects I will not have the operation. According to reliable sources, Didier Raoult has decided to create new mutations such as a spider man, a caterpillar man, a giraffe man and many others

Patterns of the spider man

"THIS IS THE BIGGEST SCIENTIFIC BREAKTHROUGH SINCE THE CREATION OF VACCINES"

Albert Einstein

Freddie mercury author of the song "I want to break free".

✓ **true fact :**

Didier Raoult is a French scientist who worked on covid 19

Technology

The new iphone 14 at 14,000 \$

The aberrant price of the new iphone

by Hamza and Noa 2 september 2022

The demand for semiconductors has only grown over time.

Until now, the production of all these small elements essential to the operation of the devices kept pace year after year.

Automobile industry or either IT sector

is crippled, and the prices are definitely getting worse.

But Apple manufacturing team launch the new Iphone 14 even though, the context is quite compromised.

Then came the health crisis caused by the Covid-19 pandemic. Since 2020, the whole world has been plunged into a global shortage of semiconductors.

Caused by the sudden stoppage of production due to the Covid restriction measures, this shortage affects many sectors of the industry and does not seem to know an end.

Apple is not immune to the shortage of semiconductors.

According to the Japanese daily "Nikkei", the Apple brand has reduced the production of its iPad tablets in order to devote more components to the production of the iPhone 13, unveiled in september.

However, even though the production is weakened, Apple launched the brand new Iphone 14.

The new design

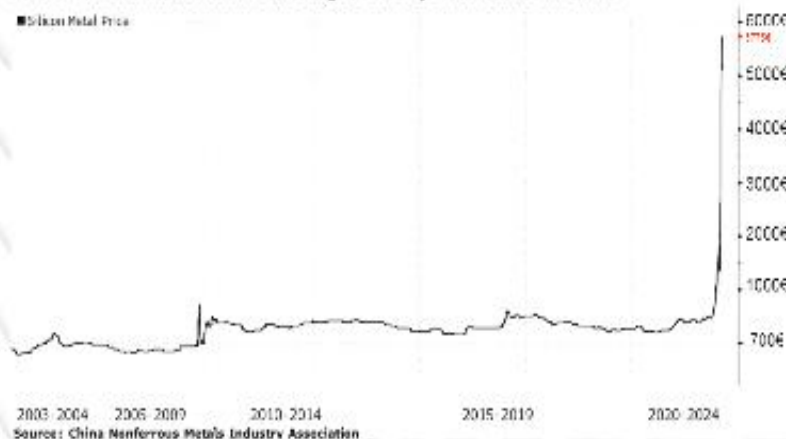

On the left the Iphone 13, on the right the new Iphone

The influence of inflation on apple selling prices

Silicon Soars

Prices for the industrial metal surged after power curbs in China

■ Silicon Metal Price

While the price of semi conductor is rising, the margin taken on product by apple gains his momentum.

We could note that Apple's profit percentage represent 242.4% for the Iphone 13, whereas the new Iphone 14 Pro Max does same but in a whole new level.

On the graphic aside, we can see the silicon's block price per years, as the pandemic rise, today the block of silicon is priced at 5775 € USD.

"MY BAD."

Tim Cook - Apple's CEO

JUST KIDDING! This article is fake news. Here is why:

Semi-conductor price inflation is true.

The new iphone 14 at 14 000 \$ and his new design, the silicon price.

Incredible! Vaccinated people discover a superpower!

A mutagen in vaccine changes patient's dna

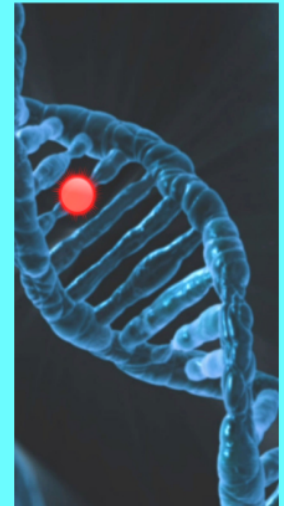

By Estelle & Lévi

This Monday, March 14, testimonies of people vaccinated from all over the world point out to the international company Pfizer numerous side effects, superhuman powers. In fact, they were observed a few weeks after their 3rd dose of the Pfizer vaccine against the coronavirus.

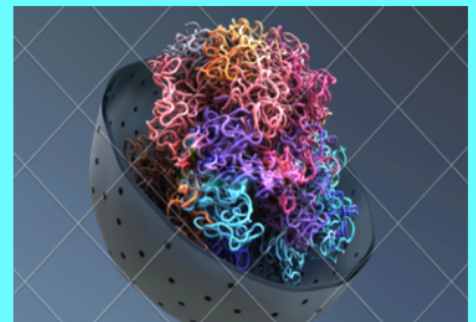

Some world-renowned laboratories, notably the Durex laboratory located in France in the town of Massy, mobilised to identify the cause of these superpowers. After further research into the cells of the affected patients, the researchers were able to observe an enlargement of their DNA, according to the testimony of Jackie Renaud, a researcher in genetics: "By taking a skin sample from a woman with superhuman powers to read minds, we were able to observe an abnormal enlargement of the DNA. In fact, the DNA was so large that it no longer fit into the nucleus and linked into the cytoplasm of the cells.

The case was kept quiet by the White House to prevent a worldwide panic, but leaked a few days ago when an accident occurred in one of the laboratories. A 15 year old boy, developing superhuman strength from his third dose of vaccine, destroyed one of the facilities where tests were being conducted in Mississippi.

The head of Pfizer spoke out about this dark story this morning in a press release. He said "We are not responsible for all these unfounded accusations! This is propaganda against us.

Is COVID-19 a conspiracy from the start ?

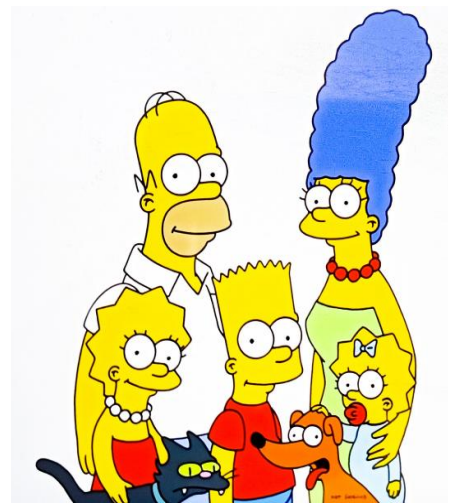

By Eugénie L. and Salma H. . Friday April 15 2022

Meeting between Emmanuel Macron and Vladimir Putin

Emmanuel Macron refused to submit to a russian PCR test

Emmanuel Macron refused to submit to a PCR test for Russian COVID-19 upon his arrival at the Kremlin and for good reason Putin would not only be responsible for the war in Ukraine but also for the new omicron variant straight out of Russia designed to eradicate the people all over the world and make Russia economically superior. Macron therefore did not want to have this tested in Russia for fear that the Russians would transmit the new variant to him.

The Simpsons family

The Simpson prediction

While In episode 21 of season 4 of the series the simpsons (released in 1993), we can see a prediction of COVID-19. Indeed in this episode we can see a flu coming from a Chinese package that Homer simpson received.

The episode shows us that this flu is spreading in the city of springfield very quickly because it is very contagious. This Chinese flu that we see in this episode is the perfect portrait of COVID-19. It's actually in conspiracy with the Russian government and the creator of the simpsons to plan a global pandemic and germ warfare with COVID-19 twenty -six years earlier.

JUST KIDDING! *This article is fake news. Here is why:*

Osaka flu in the simpsons
Macron refused to submit to a PCR test in Russia

the chinese virus in the simpsons
the conspiracy of the Russian government and the creator of the simpsons
the russians created the new omicron variant to eradicate the world population

BROWN COWS make CHOCOLATE MILK

And less than 1% people know that

The lecithin responsible for the chocolate taste of milk is also the phospholipid responsible for the brown skin of cows. This lecithin is also present in the milk produced by these cows. So this one is chocolate. The biologist Peter Duesberg and the zoologist Ned Hollister of the VWS Winsconsin Laboratory in the state of Winsconsin made this discovery. Peter Duesberg told us in an interview: "This is an amazing discovery that we made. We have been working on it for 3 years now. [...] One day a farmer, Mr Roy called us to tell us that several of his cows were producing chocolate milk and since then we have started to find out why."

Then, we interviewed Ned Hollister and he told us: "There is now a new way to obtain chocolate milk. [...] With Peter we investigated the cause of this sudden secretion of chocolate milk. After several months in experimenting on cows in the laboratory, we discovered that brown cows, if they were females over 11 years old, with an appropriate diet, are able to produce the drink with cocoa touches."

In conclusion, we can now, in a completely natural way, obtain chocolate milk thanks to certain brown cows.

JUST KIDDING! *This article is fake news. Here is why:*

 brown cow exist

Environment

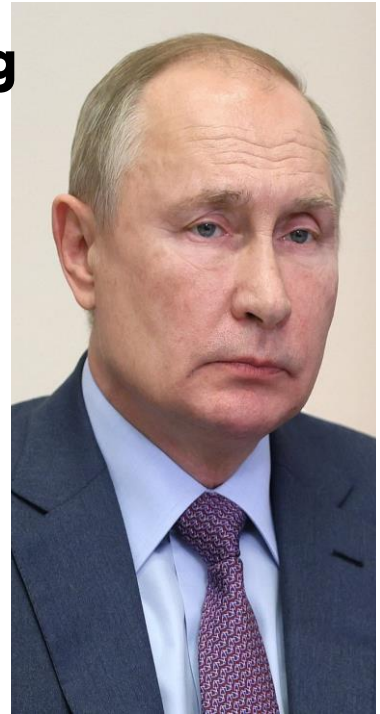

The end of the world is coming

Pollution and the Third World War effect

by Chanel and Victoria

Mangrove pollution, Qatif, Saudi Arabia, 2021

Vladimir Putin

In 2023, we estimate a very imminent end for our planet earth due to global warming cause of humans but also to the third war world that could condemn us to great risks irreversible such as new products spreading to kill the whole earth like COVID-19 but create by Vladimir Poutine

Indeed the present relationship that we have of the earth paints an apocalyptic picture.

In 2025, the increase in the average temperature on the earth's surface will have reached 7°C.

More than half of world's population will be exposed to lethal heat for at least 35 days per year. And this deadly weather persist for more than 100 days a year in West Africa, the Middle East, South America and Southeast Asia.

Two billion people will be affected by the lack of water.

Ecosystems such as the Great Barrier Reef coral or the Amazon rainforest will have collapsed.

And in summer, the Arctic Ocean will be navigable, free of ice. As for the sea level, it will have risen by 2 meters.

Half a century later, in 2050, the rise will be 4 to 5 meters.

In tropical regions, there will be more one billion climate-displaced people. Agriculture does will be more viable in subtropical regions.

The world's harvests will have fallen by a fifth.

And the population of the planet will be exposed to risks of pandemics Global warming being largely responsible for the end of the world in 2023 is due to the human.

In addition, Vladimir Putin has just declared war on Ukraine : World War III. But this will have consequences on the whole earth, since Vladimir Putin wants to annihilate the whole planet by spreading a virus from this DNA in order to dominate the whole world.

To avoid this, the rest of the world tries to fight Russia, so as not to kill the population living on earth.

JUST KIDDING! This article is fake news. Here is why:

The effect of global warming are real.
Russia declared war on Ukraine

The numbers on global warming are wrong.
Vladimir Poutine did not create a new virus

We should all bePreppers

- The human being and his sense of survival

by LanyaandAdele

when we talk about apocalypse ,that's what we imagine: disaster,hunger,fears.But we must not run away but fight **our last breath**.

The video about the bulglary supermarket takes place in Ohio in United State:people fears the hunger.

Last night at 9 pm, urgent information the whole world was warned of the apocalypse that will take place in 10 years,especially the american president who made his speech urging the famous survivalists to train the population in thistotal panic.

Now the world has a access to all comforts that our ancestors could only dream of. Despite this, a part of our population fears pandemics, natural disasters or the approach of the apocalypse exeperienced by the Maya calendar. In fact, yesterday at 9 pm in CNN, the American President Donald Trump said that there are only 10 yearsleft to the end of the world, reporting what was said by the archaeologists specialized in the study of the Maya calendar.

"It is a catastrophe the end of the world is approaching andthe coronavirus is the first warming sign we must begin to prepare for this mess."

But the Preppers or rather survivalists are the best prepared with bunker inthe garden full of food supplies, andwater to face hunger in the event of aneconomic crisis or to face days of isolation. Right now, in the social networks shoot the video of a supermarket burglary in the United States of America and Italy. The american and italian preppers are stocking upon thousands of packets of pasta and spaghetti, impossible to survive without lasagna and meatballs pasta.

"we cannot blame these people who are driven by fear."

Trump reported in his speech last night live in the state of washington.However what we can do is to anticipate the apocalypse with our skills, ability and intelligence.In Europe, villages are being built where preppers, who are of great help in this situationof extreme urgency, teach the laws of survival, what they associate with their lifestyle.

"WE HOPE FOR THE BEST BUT WE ARE ALWAYS READY TO FACE THE WORST EVEN THIS APOCALYPSE ANNOUNCED YESTERDAY BY OUR PRESIDENT".

James smith, 30 years old an American prepper

JUST KIDDING! This article is fake news. Here is why:

- <https://www.loveproperty.com/gallerylist/96173/doomsday-refuge-inside-the-worlds-largest-prepper-community>
- <https://www.theguardian.com/global/2020/apr/30/preppers-survivalists-disasters-lessons>
- Don't worry there is no burglary of pasta you can eat meatball pasta as much as you want.

Don't worry there is no apocalypse in 10 years, it's just to have a laugh and imagine a similar critical situation someday .But our survivalists really exist in the reality in each country, with their underground bunkers (yeah! that's insane!9 and food supplies,and Trump has never given speeches live yesterday.
